

Pendulum Accuracy Coaching

(for clients requesting consultations to help with their pendulum testing)

Client Name:

Pre-consult Checklist

Is the Client's Source team 100% LLT? Y/N

Is the client's frequency sufficiently high enough to connect with Source and set up their pendulum "yes's and no's" accurately? Yes/No

If no:

One reason or more than one reason below?

Is this due to physical illness?

Is this due to pathological or imbalanced emotions?

Is this due to mental beliefs?

Are they very dehydrated?

Other?

If yes:

Over the last week/month/day, how accurate were their pendulum readings for **themselves** 0-100?

What is their overall trust level in their ability to test (doubt quotient)?
0-100%

Where they were inaccurate, was it due to one reason or more than one reason? If more than one reason - how many?

Were their readings inaccurate due to being:

- Ungrounded Y/N - % of time

- Deharmonized Y/N - % of time
- Disconnected from Source Y/No % of time
- Biased Y/N % of time due to emotional attachment
- Biased Y/N % of time due to mental guessing/intellect
- Biased Y/N % other
- Asking poor quality questions Y/N % of time
- Not permitted to ask the question Y/N % of time

Over the last week/month/day, how accurate were their pendulum readings for **others** 0-100?
